

Appendix 8: Fuel

The following table identifies fuel availability on the route. In the more populated areas, there will be additional refuelling opportunities to the ones listed. Some may be identified in the route instructions.

Diesel is readily available. Please note that some suppliers may have re-branded.

If your vehicle can't travel 503 km of primarily unsealed roads on one tank, you will need to carry extra fuel on board. It is highly recommended that you carry an octane boost product if your engine will not run well on 91 or 95 RON fuels. It is recommended that crews refuel at the end of each day.

Day	Km from day start	Location	Brands	Fuels available
1	0	Perth	Refuel before start	Multiple options
	247	Dalwallinu	Puma	91&95
	268	Wubin	BP, Mobil	95&98, 91
